# ATUAR AL-KOWN COMPANY PROFILE

Second Classification  
contracting company

## GENERAL INFORMATION

Atwar Alkown Company opened its doors for business about 12 years ago as a professional company, a hundred percent Saudi organization under the sponsorship of advanced intelligent management followed by contracting, equipment & material division. Along with the lines of development taking place in the kingdom of Saudi Arabia under the great leadership, a humble beginning made two decades ago by Atwar Alkown Company has branched out successfully from contracting to equipment's as well as materials. The objective of Atwar Alkown Company management is to provide a first class quality service to all our customers at all times.

It is company policy to establish and maintain an effective quality management system.

Our goal is to be the first choice of our customers and employees by getting it right, on time, every time.

To promote a uniformity of work method throughout, irrespective of project organization, certain procedures fundamental to the company activities are implemented at all times without significant deviation.

## GENERAL Manger's Message

Atwar Alkown Company general manager happy to place on record my sincere and heartfelt appreciation for the tremendous trust and faith reposed in our Group.

While thanking Almighty Allah for his abundant blessings which has helped us to grow from strength to power, we pray for his continued blessings in breaking new frontiers and achieving greater milestones.

Atwar Alkown believes in providing customers with great products and services.

We are fully dedicated in providing our clients with the best value in superior quality and services. Our commitment to quality has served in our growth to become one of the most renowned companies in the Kingdom of Saudi Arabia.

Good quality construction does not come by chance. It can be only the product of hard and disciplined work exerted by technical, administrative and financial teams, synchronized together under the roof of an experienced institution, working under internationally recognized quality codes and abiding by self-made codes of ethics and integrity. We remain steady in terms of commitment to our clients.

As modern management techniques are incorporated and new customers join with the current ones, we will continue our efforts to strive hard in the right perspective.

With Warm Regards

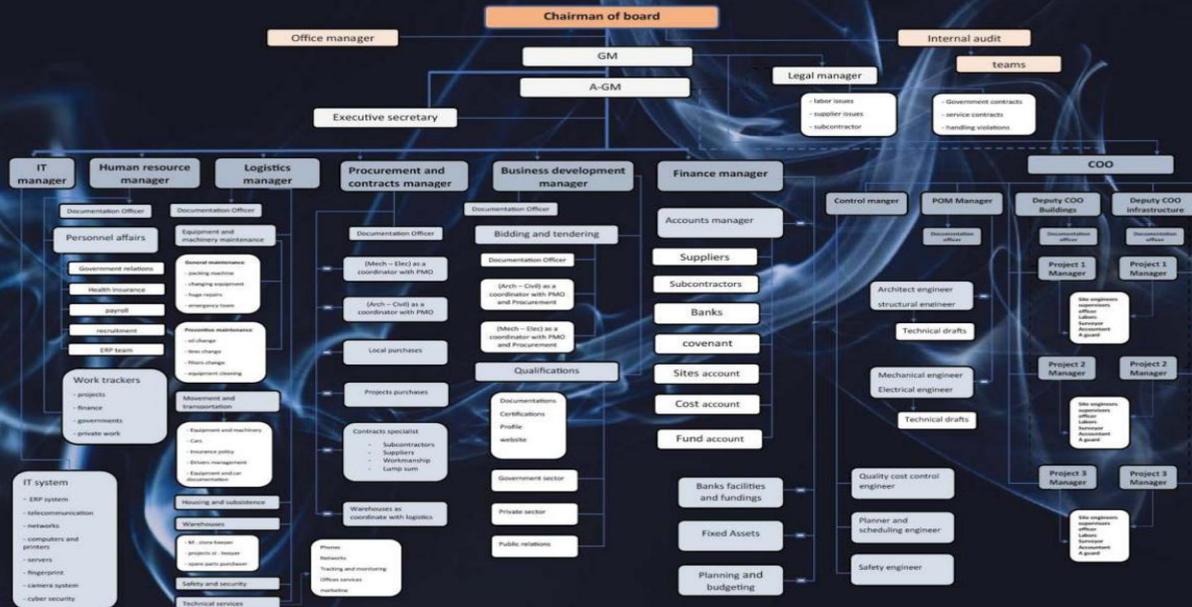

Our motto is to give them total satisfaction, in terms of quality and valued services constantly. Atwar Alkown is total quality management is evident in a range of technical services, and has a well earned reputation for splendid craftsmanship, rapid response, safe execution and dependable performance.

We are thorough, yet flexible in the services we provide.

We believe in building trust and establish a long term relationship with our clients.

I would like to encourage you to go through our pre-qualification for more information to enable us to answer your queries.

With an aim to become one of the most ethical companies In the world, Samsung continues to train its employees and operate monitoring systems, while practicing fair and transparent corporate management.

---

# Over View

Our company prides itself on a systematic and disciplined approach to project management. We follow a well-defined methodology that serves as the foundation for all our project execution processes. This ensures that each project is carefully planned, precisely executed, and closely monitored throughout its lifecycle. By leveraging this methodology, we efficiently manage resources, mitigate risks, and deliver results that meet or exceed client expectations. Our team's expertise in project management allows us to tackle complex challenges with confidence and agility. Through consistent application of this methodology, we achieve successful outcomes, earn client trust, and continuously improve our project delivery practices.

Our company leverages advanced technology to enhance project control and streamline operations, with Bitrix as our central platform for project management, collaboration, and communication. Bitrix enables real-time task coordination, progress tracking, and resource management, helping our teams stay organized, responsive, and on schedule. Its comprehensive tools—from task assignment and time tracking to document management—drive efficiency, accountability, and collaboration, allowing us to deliver exceptional results to our clients.

## 1-Nature and Scope of the Project Element:

- Provide evidence that the applicant understands the overall objectives, goals, and scope of the project.
- Highlight any relevant experience the applicant has with similar projects in terms of size, complexity, and industry.
- Detail any specific challenges or unique aspects of the project that the applicant is aware of and prepared to address.

## 2. Specific Problems that Might Arise on the Project:

Certainly, several specific problems might arise during a project:

3. Scope Creep: One of the most common issues is when the scope of the project expands beyond its original boundaries. This can happen due to unclear requirements or stakeholders requesting additional features, leading to delays and increased costs.

4. Resource Constraints: Limited resources such as budget, manpower, or materials can hinder progress. If these constraints are not managed effectively, it can result in project delays or compromised quality.

5. Communication Breakdowns: Poor communication among team members, stakeholders, or clients can lead to misunderstandings, errors, and delays in decision-making. Clear and open communication channels are crucial for project success.

6. Risk Management: Failure to identify, assess, and mitigate risks can result in unexpected issues that derail the project. This could include technical challenges, market fluctuations, or unforeseen obstacles that were not accounted for in the project plan.

7. **Quality Control:** Insufficient attention to quality assurance and control processes can lead to defects, rework, or customer dissatisfaction. Maintaining high-quality standards throughout the project lifecycle is essential for meeting project goals.

8. **Change Management:** The inability to manage changes effectively can disrupt project momentum and lead to resistance from team members or stakeholders. It's important to have a structured change management process in place to address alterations to project requirements or objectives.

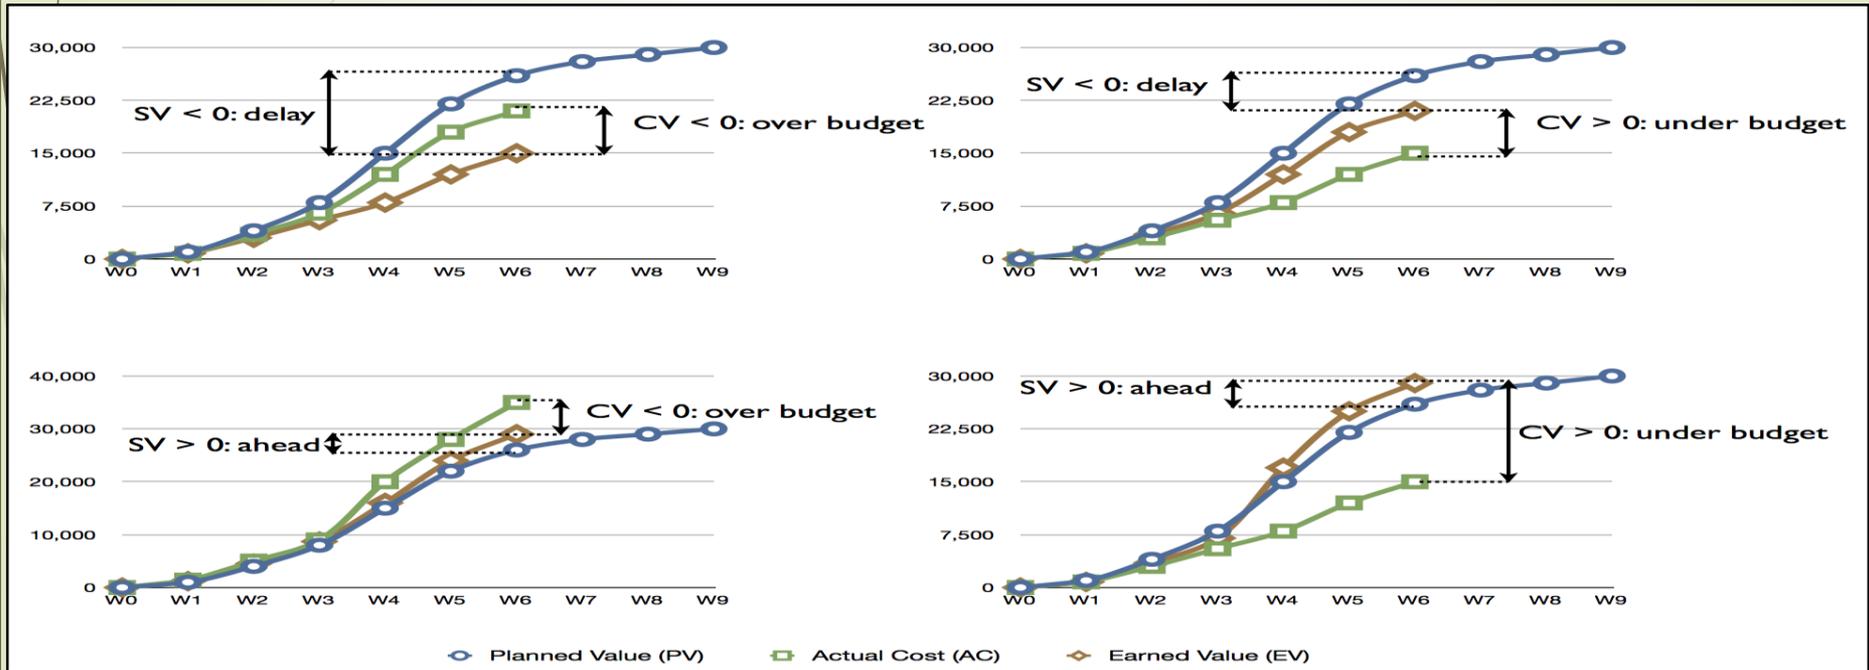

9. **Dependency Risks:** Projects often rely on external dependencies such as vendors, suppliers, or regulatory approvals. Delays or issues with these dependencies can impact project timelines and deliverables.

8. **Stakeholder Management:** Conflicting interests or lack of stakeholder engagement can impede progress and lead to project roadblocks. Engaging stakeholders early and often, and addressing their concerns and expectations, is essential for project success.

10. **Potential Solutions for Those Problems:**

Addressing project lateness requires a multifaceted approach aimed at identifying root causes and implementing effective solutions to mitigate delays. First and foremost, revisiting the project plan and schedule is crucial to identify any areas where timelines can be optimized or resources reallocated. This may involve breaking down tasks into smaller, more manageable units, setting realistic milestones, and establishing clear accountability among team members. Additionally, addressing resource constraints by ensuring adequate staffing, budget allocation, and access to necessary tools and equipment can help streamline project execution. Proactively managing scope creep through regular stakeholder communication and change control processes can prevent the project from veering off course. Enhancing communication channels and fostering a culture of transparency and collaboration among team members and stakeholders can also help facilitate timely decision-making and problem-solving. Implementing robust

Risk management practices to identify, assess, and mitigate potential threats to the project timeline are essential. Finally, leveraging project management tools and technologies to monitor progress, track key metrics, and identify early warning signs of delays can enable proactive intervention to keep the project on track. By addressing these aspects comprehensively, project teams can increase their chances of delivering projects on time and within budget.

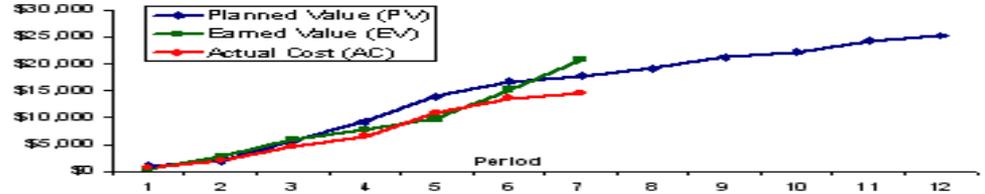

Metrics, and identifying early warning signs of delays can enable proactive intervention to keep the project on track. By addressing these aspects comprehensively, project teams can increase their chances of delivering projects on time and within budget. We can use a timeline formula to control the project time and budget:
